Welcome to CCEI950

Divorce is a fact of life in the United States and it can have dramatic, long-term effects on child development. Infants, toddlers, preschoolers, and older children all have emotional, physical, and other responses to divorce. Teachers are in a unique position to help children cope and to provide essential moral and educational support. This course offers strategies teachers can use to help children through these difficult times. Also, this course provides advice that teachers and center administrators should consider in order to avoid potential legal or ethical entanglements.

**Course Objectives:**

By taking notes on the handout and successfully answering assessment questions, participants will meet the following objectives as a result of taking this course:

- Identify common impacts that divorce can have on young children
- Identify common symptoms of stress that a child may exhibit at varying developmental stages
- Identify strategies teachers can use to help young children cope with divorce in the areas of physical, emotional, and social development
- Identify appropriate policies centers should put in place in order to avoid legal entanglements or undue stress on children

Stress and Brain Development

Notes from the video:

Erikson’s Stages of Psychosocial Development:

<table>
<thead>
<tr>
<th>Stage</th>
<th>Approximate Age</th>
<th>Positively Characterized by:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust vs. Mistrust</td>
<td>Birth – 18 mos.</td>
<td>Learning to trust, bonding with caregivers</td>
</tr>
<tr>
<td>Autonomy vs. Shame &amp; Doubt</td>
<td>18 mos. – 3 yrs.</td>
<td>Developing independence and self-esteem</td>
</tr>
<tr>
<td>Initiative vs. Guilt</td>
<td>3-5</td>
<td>Building ambition and responsibility</td>
</tr>
<tr>
<td>Industry vs. Inferiority</td>
<td>5-12</td>
<td>Developing skills, pride, and competence</td>
</tr>
<tr>
<td>Identity vs. Role Confusion</td>
<td>12-20</td>
<td>Developing a sense of self and values</td>
</tr>
<tr>
<td>Intimacy vs. Isolation</td>
<td>20-40</td>
<td>Build lasting relationships, sharing life</td>
</tr>
<tr>
<td>Generativity vs. Stagnation</td>
<td>40-65</td>
<td>Ability to give back, make a difference</td>

**Infants and Divorce**

Infants do not understand ____________ but they do respond to ____________.

What effect might a breakdown in routines have on an infant?

Define attachment:

Why are attachments important in early childhood? What impact might divorce have on those attachments?

**Toddlers and Divorce**

List possible effects of divorce on toddlers:

**Preschoolers and Divorce**
What differences are there between a preschooler and an infant/toddler as a result of divorce?

**School-Age Children and Divorce**

The older children get, the more likely they are to feel:

**How Teachers Can Help**

Above all, be ______________ and ______________!

**Routines, Nutrition, Rest**

Why are each of the following factors important in helping children cope with divorce?

**Routines**

**Nutrition**

**Rest**

**Additional Strategies for Helping Children**
Write notes about how each of the following can be helpful in the classroom:

**Encourage Expression**

Talk –

Art –

Sensory play –

Role play –

Writing –

**Interests and Hobbies**

**Physical Activity**

**Books**

**Promote Self-Esteem**

**Humor**
Parental Involvement

Effects of Divorce on Child Care Professionals and Programs

It is essential all program staff have a crystal clear understanding of their role. In particular, two points need to be emphasized:

1.

2.

Parent Communication and Custody Disputes

Write a brief summary describing what role (if any) a teacher/caregiver should take if two parents are openly hostile toward one another:

Center Policies

Legal Documentation

What types of legal documents should parents provide to the center?
Kidnapping

Why is kidnapping a threat? What can the child care center do to help prevent it?

Scheduling

Why are parents’ schedules so important?

What can a center do to help ensure that both parents stay informed and involved?

Try This!

Make Food Fun

Children are usually more likely to eat if they are involved in making the food. This is also a good chance to get them to try something new and nutritious!

Young children should not be involved in any cooking activities involving heat, so keep them away from ovens and stoves within the center. But there are plenty of ways they can “cook” without heat, and if heat is needed, then the teacher or kitchen staff can take care of it for the child. Some ideas:

Pizza is an obvious favorite. Use readymade pizza crusts, or you can use a bagel, pita, or English muffin. Sandwiches are easy to make, whether they involves cheese, jelly, or meat. (Peanut butter is not recommended in the child care setting due to potential allergies.) Invite the child to use cookie cutters to create fun shapes after the sandwich is pieced together.

Yogurt parfait is easy to make and it’s healthier than ice cream. Add ingredients like berries and granola.

Create a Veggie City or a Veggie Forest using carrot sticks, broccoli florets, celery, sliced bell peppers, etc. You can mix cream cheese and ranch to make a thick dressing that the child can use to “glue” the veggies together for a sturdier, edible model.
